

AIDS 2018 Track E abstract submission categories

Track E: Implementation Research, Economics, Systems and Synergies with other Health and Development Sectors	
Global and national financing, economic evaluation, and sustainability	
E1	National financing analyses and initiatives
E2	Transitional financing
E3	International assistance, frameworks, and funding mechanisms
E4	Financing HIV within UHC frameworks
E5	Evidence on payment by results and other performance based mechanisms
E6	Approaches to achieving sustainability
E7	Economic evaluation and affordability assessments
E8	Supporting sustainable financing for civil society
E9	Financing HIV drug access: the economics of generics and differential pricing structures
E10	HIV and universal health coverage
E11	Blended financing
Opportunities for economies of scale and scope	
E12	Evidence from integration of health services
E13	Evidence from cross-sectoral programming
E14	Approaches to financing across sectors
Cost effectiveness, affordability	
E15	Assessments of cost-effectiveness : provider and community perspectives
E16	Economics of affordability
Health systems & new partnerships	
E17	Supporting effective linkages between Maternal and HIV services
E18	Approaches to effective HIV/SRH integration
E19	Approaches to effective HIV/TB service delivery
E20	Supporting resilient health systems
E21	Making health systems work for adolescents
E22	Community participation in systems for health
E23	Delivering paediatric HIV services
E24	Approaches to minimising loss in the prevention/treatment cascade
E25	Getting policies into practice
E26	Systems serving underserved populations
E27	Evidence on making task shifting work
E28	Systems to deliver effective, long term chronic care
E29	Integrating mental health and wellness in HIV programming
E30	Partnerships involving donors, NGOs, and government
E31	Public-private partnerships
E32	Partnerships across HIV and other vertical programmes, e.g., tuberculosis, sexually transmitted infections, drug treatment, family planning
Programming at scale	
E33	Approaches to scale and the optimisation of service delivery
E34	Methods to improve service quality, support and tailoring of services
E35	Prep: lessons learned from delivery
E36	Testing and treatment at scale : issues and lessons
E37	HIV self-testing for HIV and linkages to prevention and care

E38	Ensuring continuity of services for mobile populations
E39	Approaches to viral load monitoring at scale
E40	Innovations and lessons for supporting adherence
E41	Adolescent and youth programming
E42	Delivering in services in and around conflict settings
E43	HIV service delivery in conflict affected and humanitarian settings
E44	Adapting HIV programmes to systems with severe resource constraints
E45	Key populations in humanitarian settings and fragile contexts
E46	Integrating HIV and other health programming in migrant or refugee settings
E47	Delivering differentiated care
E48	Strategies to Increase Uptake of retention in HIV Services
HIV & development synergies	
E49	Combination programming on social drivers of HIV (including education; violence; & workplaces)
E50	Delivering gender transformative programmes and tackling violence against women and girls: programmatic lessons
E51	Social protection: new evidence and programmatic lessons
Innovations in data collection, monitoring and evaluation	
E52	Innovations in behavioural data collection and use
E53	Big data: an untapped opportunity?
E54	Innovative approaches to track individuals
E55	Innovative uses of data to strengthen systems and programmes
E56	Approaches to using data to improve programming
E57	Evaluating large scale programmes: approaches to rigorous evaluation
E58	Implementation science: lessons from researcher / programme partnerships
E59	Combination prevention: evaluation methods
E60	Effective approaches to linking population and programme data, to inform HIV programming
E61	Data and accountability and transparency
E62	Monitoring and reporting in the SDG era
